

FIELD SERVICES

Providing Added Value

K Machine Industrial Services provides added value to our customers with our professional and efficient field services. These service offerings include on-site millwrights and machinists.

Our field machining superintendents are experienced professionals who are highly familiar with large steam turbine and high-pressure valve outage work in power generation (fossil-fired, nuclear, waste-to-energy, hydro), oil & gas production (refineries), and pulp & paper (saw mills and paper mills) industries.

We have a vast array of machining resources, including:

- ▶ Portable machine shops
- ▶ Boring bars up to 12' diameter swing and extending more than 21'
- ▶ Portable lathes with CNC controls (capacity up to 200 tons/12' diameter)
- ▶ Flange facers up to 10' diameter
- ▶ Over 300 custom-designed pieces of portable machining equipment
- ▶ And more
