

GAS TURBINE PRODUCT LINE

Exhaust Frame & Diffuser Solutions

Complementary Service Offerings

K Machine is officially the “Authorized Service Provider” for Integrity Power Solution (IPS) as IPS continues to be the official “Channel to Market”. We have come to this strategic agreement to better serve our gas turbine customers. Our current solutions for the HDGT Exhaust Frames/Cylinders/Gas Housings are fully under way. We are working with customers now to improve the life of their critical equipment.

About IPS and K Machine

Integrity Power Solutions is an experienced full-service provider of gas turbine (GT) inlet systems, exhaust systems, and enclosure repairs and replacements. As an Original Equipment Manufacturer (OEM) licensee, we can coordinate with any OEM third party to ensure that your systems operate at maximum efficiency.

K Machine is a specialized machining services company and on-site industrial contractor focused on mobile, on-site machining of steam turbines, gas turbines and other heavy rotating equipment. We operate an 85,000 square foot industrial repair facility in Savannah, Georgia with smaller supporting facilities throughout the southern US.

IPS and K Machine are the perfect match to bring you the highest quality solution for your gas turbine.

Do you need your GT Exhaust inspected?

If you answer YES to any of the following questions, contact us for support on your Gas Turbine:

- Is your unit 15 years or older?
- Do your exhaust frame cooling blower motors overamp?
- Do you have to run both cooling blower motors?
- Do you have an upcoming major inspection?

Do you experience any of the below “typical” problem areas?

- Outer Diffuser Flex Seal Failures
- Inner Diffuser L Seal Block Cracking
- Parting Joint Separation and Cracking
- Airfoil Tail and Skirt Loss or Cracking
- Stainless Steel Material Reaching End of Life
