

STEAM TURBINE PARTS

See Why K Machine Is the Industry's
Leading Manufacturer

K Machine Industrial Services is the only known independent manufacturer in the world that can produce steam turbine diaphragms on a short-cycle basis. We reverse engineer and manufacture new parts per OEM specifications for a large variety of OEM designs.

- ▶ Valve components
- ▶ Diaphragms
- ▶ Case bolts
- ▶ Seals
- ▶ Bearings and gland housings

K Machine immediately gets to work with our reverse engineering process, and we convert data into a model that is ultimately used for CNC machine programming. We discuss recommendations for improvements in materials and integrity with the customer.
